

POSCAR Digital Co., Ltd. is a solutions-driven company focused on digitalizing eco-platforms for education and business operations, with a strong commitment to supporting SMEs in Cambodia. The company offers two primary products: **WikiSchool/WikiCollege**, tailored for educational institutions, and **Vithean**, designed specifically for SMEs and the private sector.

Product Overviews:

WikiSchool is a School Management System developed for kindergarten and K12 programs. Since its launch in 2018, it has been widely adopted, helping schools streamline administrative tasks, improve productivity, and encourage parental involvement by allowing them to monitor their children's school activities and learning progress.

WikiCollege is a University Management System designed to optimize college and university operations, providing comprehensive tools for both institutions and students.

Vithean is an advanced accounting software that offers a smart solution to simplify and expedite work processes while adhering to local regulations. It includes a full suite of standard accounting features and resource planning tools, covering everything from master data management, inventory, invoicing, and billing, to comprehensive financial reporting. With over 100 report formats, Vithean enables users to closely monitor the health and performance of their business operations.
